

Nov 28 - CP
 End Momentum
 Start Work + Power
 CLT - Define work and what is
 and is not work in several
 situations.

$$W = F \times d$$

$$= 20 \text{ N} \times 1.2 \text{ m}$$

$$= 24 \text{ Nm} \quad \text{or} \quad 24 \text{ Joules}$$

$1 \text{ N} \cdot \text{m} = 1 \text{ J}$
