

Sept 6

Starting our
Force and Motion
unit.

"How will it move?"

what is a force?

A Force is a push
or a pull.

examples - Push/pull a door
dork (brother)

magnets attract or
repel

gravity
static electricity

Contact forces

Touching

- Kicking a ball
- Bumping someone
- Pulling someone
- Pushing the pen or pencil
- Punching
- Friction
- Face plant

Forces at a distance

Gravity - the attraction between things that have mass. And you are attracted to everything that has mass, in the universe

Magnetism -
static electricity
